Allan barks

I am writing in response to permit # mi-139-11-0007 and mi-139-11-0008. I know the dumps in my area, salem mi are always getting violations for the wells not working and they are not 4000+ feet down. How could the state monitor wells this deep and think republic can keep them safe when they can't do what they promise to do with the existing wells. Please stop this from going in and make them correct problems they have before making more.
